Aqua Sub XTREME™

25 Gallon Battery Watering Cart - NC25X

The Aqua Sub XTREME™ is an AC/DC powered watering cart. The cart is powered by 12-volt battery (included) with its own on-board charger. The battery's state of charge is indicated by LED lights and the pump will automatically shut off if the battery is low. AC power can be used to either power the cart or charge the battery. The new cart features a space-saving upright design that is easy to maneuver. The translucent tank allows monitoring of the water level while in use.

Part# NC25XB
25 Gallon XTREME Cart with
Direct Fill Link with 09FBLUT3 connector (DF72)

25 Gallon (95 L) Capacity - Thick-walled polypropylene tank is corrosion resistant with a large flip-top lid for easy filling. The translucent tank with gallon and liter gradations allows for quick visual checks of the water level. For best results, fill tank with deionized water from our Deionizer (Part # PW1800).

AC/DC Powered - Power the cart using the on-board battery or use AC power. The cart accepts global AC voltages. The included AC cord is for US/Canadian style outlets and is 12' in length. Contact us for other cord configuration requirements.

Assembly - No assembly required. The XTREME cart is ready to use out of the box, just add water and go!

Battery Included - 12-volt sealed battery included. If the battery becomes low the pump will shut off and a red LED light will flash.

Charger - The built in charger charges the battery when the cart is plugged into AC power and the cart is switched off. LED lights indicate whether the battery is charging or if the charge is complete. The charger shuts off when charge is complete and applies a maintenance charge as needed.

Direct Fill Link Options - Optional direct fill links available with cart. With a built in pressure regulator, the Direct Fill Link delivers the right amount of pressure to fill batteries quickly and efficiently. (See reverse for part numbers)

Manual Watering - Available with a manual watering gun. (Part# NC25X-MAN)

Hose - 15' (4.6 m) of 3/8" (9.5 mm) industrial hose is included.

Pump - 2.2 G.P.M. diaphragm pump with in-line 15 amp fuse.

Strainer - Built in, easy to clean strainer, prevents debris from entering the pump or your batteries.

Save on Shipping - New space-saving design allows for ground shipping rates without any additional surcharge; LTL is not required. Larger orders can be shipped LTL with up to 8 carts per pallet.

Warranty - 1 year parts and labor.
